

Christmas dot-to-dot: tree 1-20

Join the dots from 1 to 20. From 20 go back to 1. Then decorate the tree and color it.

Recommended age: 5-6 years · christmas

Name

Date

Tip for parents: If the child doesn't know the numbers above ten yet, read them together: "after nineteen comes twenty". Two-digit numbers take longer to find, and that's fine.

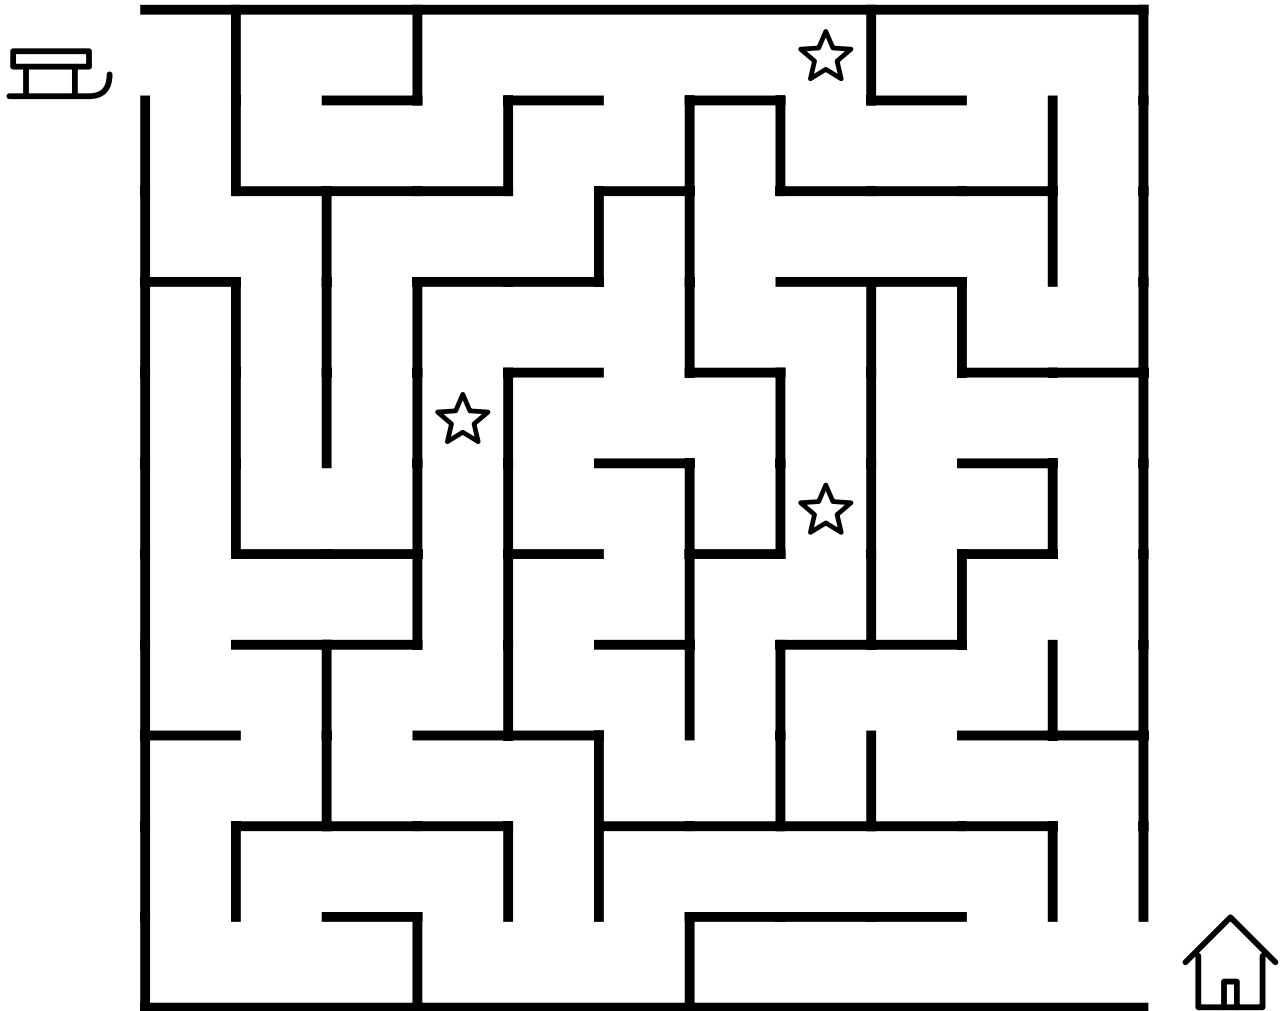

Christmas maze: sled with presents

Take the sled to the house. Collect three stars on the way. Find the way with your eyes first, then draw.

Recommended age: 5–6 years · christmas

Name

Date

The sled takes presents to the house. Collect three stars on the way.

Tip for parents: Break the route into stretches: from the sled to the first star, then the second, the third and the house. If attention runs out halfway, finish tomorrow from the last star.

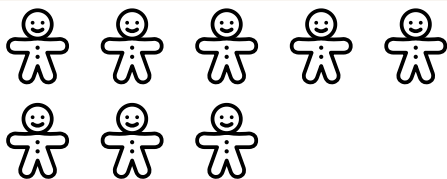

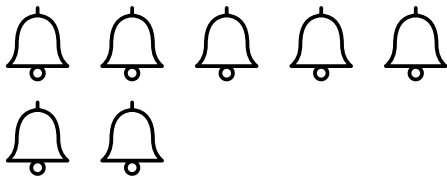

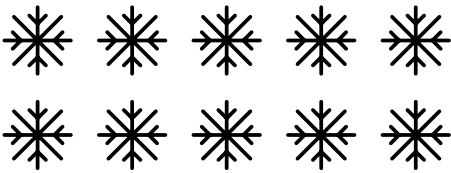

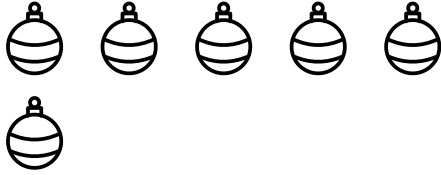

Christmas counting 1-10

Count the pictures in each row and write in the box how many there are.

Recommended age: 5-6 years · christmas

Name _____

Date _____

Tip for parents: A child who doesn't write numerals yet can make tally marks or dots in the box. At ten, show that it is two full rows of five.

Christmas patterns: what comes next?

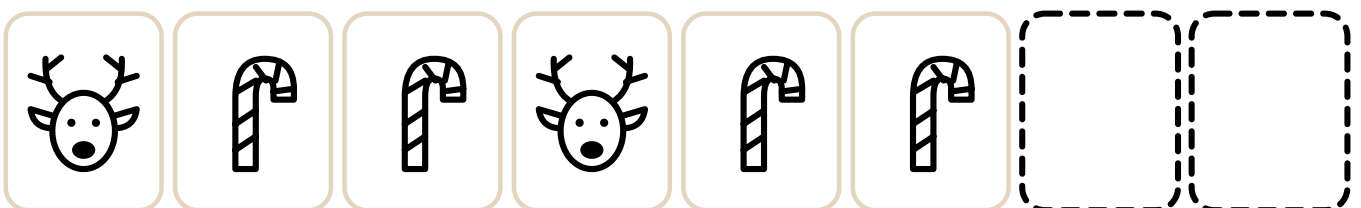

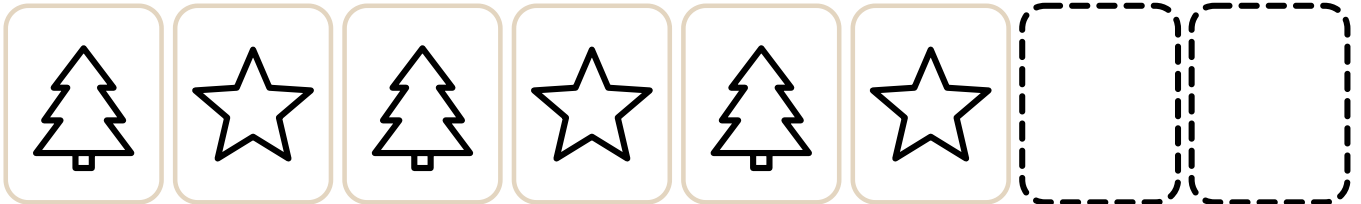

Look at how the pictures in the row take turns. What comes next? Draw two pictures in the empty boxes.

Recommended age: 5–6 years • christmas

Name

Date

What comes next? Draw two pictures in the empty boxes.

Tip for parents: Read the row out loud in rhythm: “tree, star, tree, star...” – the ear catches the pattern before the eye does. A child who doesn’t want to draw can just say the answer.
