

Dot-to-dot: oak leaf 1-20

Join the dots from 1 to 20. From 20 go back to 1. Then color the leaf and look for a real oak leaf on your next walk.

Recommended age: 5-6 years • fall

Name

Date

Tip for parents: If the child doesn't know the numbers above ten yet, read them together: "after nineteen comes twenty". Two-digit numbers take longer to find, and that's fine.

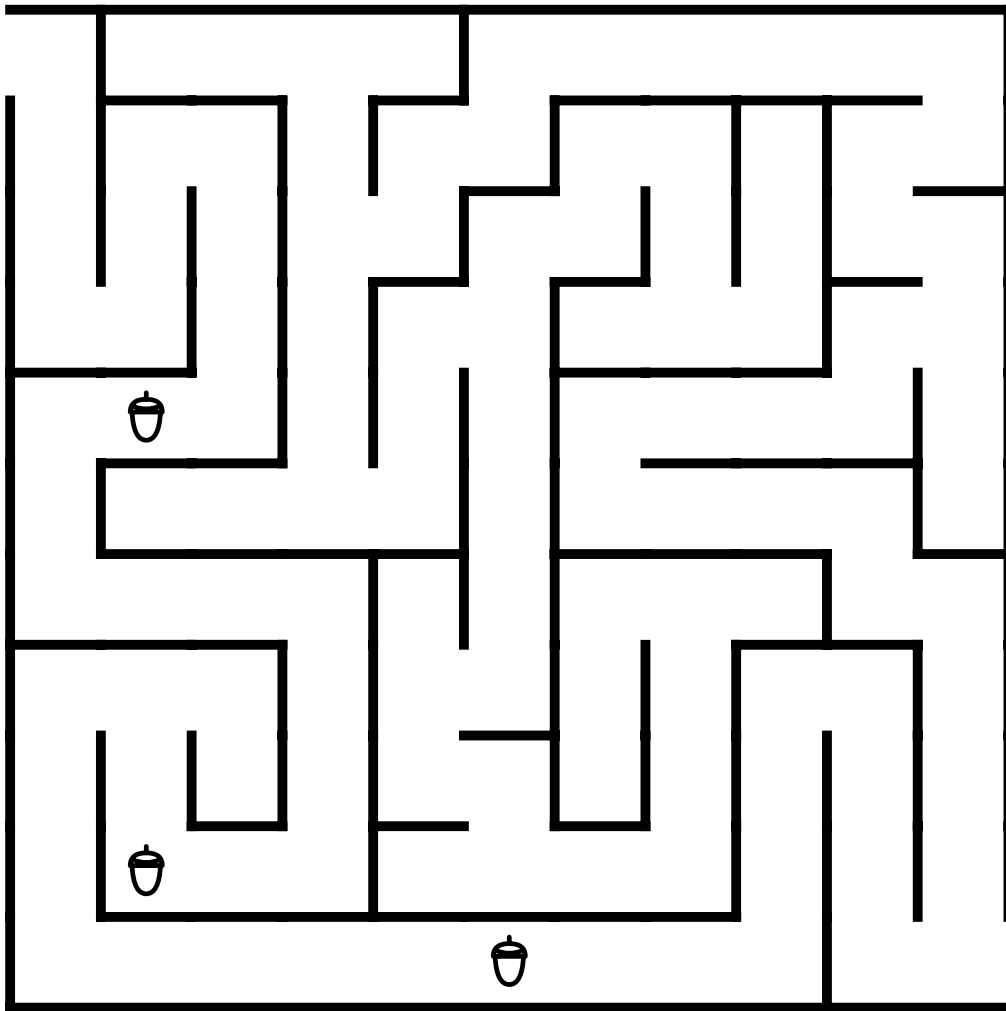

Fall maze: squirrel and acorns

Take the squirrel to the tree. Collect three acorns on the way. Find the way with your eyes first, then draw.

Recommended age: 5–6 years · fall

Name

Date

The squirrel carries food to the tree. Collect three acorns on the way.

Tip for parents: Break the route into stretches: from the squirrel to the first acorn, then the second, the third and the tree. If attention runs out halfway, finish tomorrow from the last acorn.

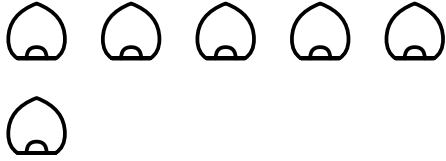

Fall counting 1-10

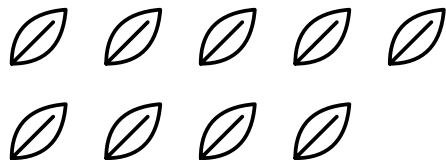

Count the pictures in each row and write in the box how many there are.

Recommended age: 5-6 years · fall

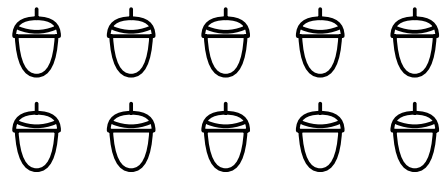

Name _____

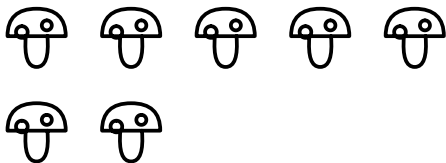

Date _____

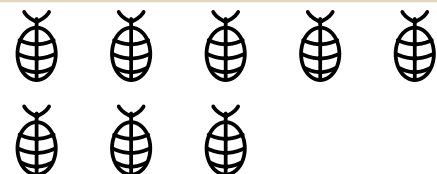

Tip for parents: A child who doesn't write numerals yet can make tally marks or dots in the box. At ten, show that it is two full rows of five.

Fall patterns: what comes next?

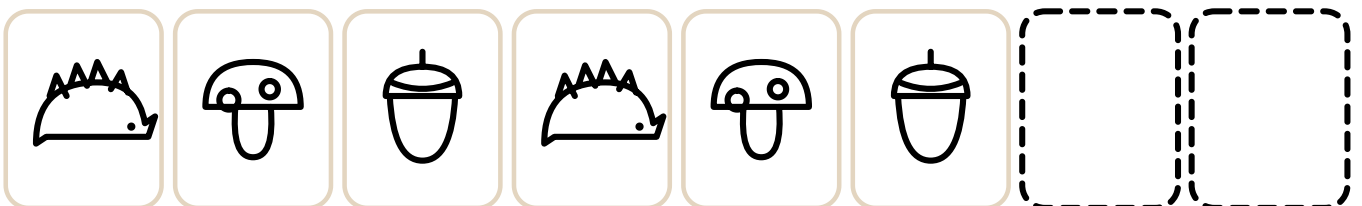

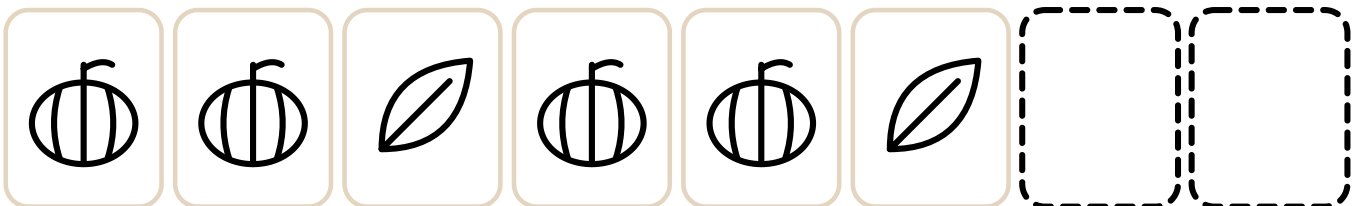

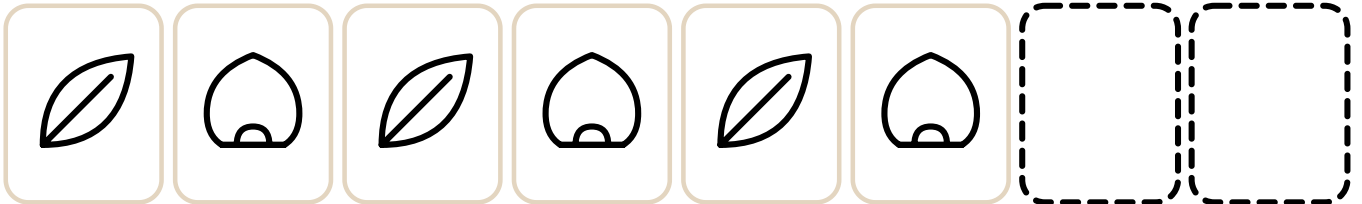

Look at how the pictures in the row take turns. What comes next? Draw two pictures in the empty boxes.

Recommended age: 5–6 years • fall

Name

Date

What comes next? Draw two pictures in the empty boxes.

Tip for parents: Read the row out loud in rhythm: “leaf, chestnut, leaf, chestnut...” – the ear catches the pattern before the eye does. At home you can build the same row from real chestnuts and pine cones on the table.
